

IME

LOSS ADJUSTERS & SURVEYORS

Cargo Inspection Services

24/7

**we are
available**

IME Loss Adjusters & Surveyors is looked upon as one of the preeminent providers of Cargo Inspection Services in Panama and nearby countries. As the trusted Cargo Surveyor, we have catered to the specific requisites of our esteemed clients.

IME is known for its ability to provide comprehensive and skilled assessments of damage sustained to all types of commodities during transport by rail, road, air and sea. As a leading surveying company in our regions of coverage, we offer a full range of services regarding cargo inspection and loss adjusting.

In addition to assessments for claims resulting from damage to goods during transit, **IME** provides independent and impartial services to verify that you are getting what you pay for. This service encompasses all aspects of the land transportation component, and the loading, stowage, sea fastening, discharge and delivery and the verification of loading/discharging procedures.

We determine the quantity of both dry and liquid bulk cargoes loaded and discharged by draft survey, tank measurement, or other suitable means. We also verify that a cargo meets specific parameters through representative sampling and testing. Finally, we conduct a physical cubic measurement of a particular cargo to determine freight payable and to enhance pre-planning stowage. **IME** provides surveys for compliance, packaging, stowage and marking or labeling for the shipment of dangerous goods, including radioactive materials.

Our team of experience surveyors is trained in the handling, segregation and storage of goods and dangerous goods.

☑ **PRE-SHIPMENT SURVEYS** ☑ **HOLD AND TANK CLEANLINESS** ☑ **CONTAINER SURVEYS**
